Improving Skills Through Dedication

To learn new skills, you need dedication. At this point in my life, for example, I'm dedicating myself to learning French. To do this, I listen to podcasts, interviews, music and anything that interests me, as long as it's in the target language, because my goal is to speak and understand French well. I know it's an ongoing process, but I believe that perseverance is essential for success. What have you done to improve your skills?
