### MOVIE REVIEW WITH LOU, GIFTED HANDS: THE BEN CARSON STORY

The Ben Carson Story (2009) is a biographical drama film that involves medicine and a story of overcoming. Directed and produced by Thomas Carter and written by John Pielmeier, the film is based on the autobiography of neurosurgeon Benjamin Carson, who became a politician later.

Ben Carson was considered dumb by his classmates. He wouldn't get any questions right on the exam and didn't have a good imagination. His single mother, Sonya, is frustrated about her son's grades and failures and decides to do something about it, so she requires him and his older brother, Curtis, to study so they can have a bright future that she never had. She obligated the two kids to watch less television and read more books. They complained, but eventually, they got their first book, and things got more interesting. At the end of the week, the brothers should deliver a report about the books they read to their mother.

Ben read a lot of books about rocks and chemicals and started to be the best in his class, evolving throughout the years. He had a lot of faith in God during his troubled adolescence and began to get back to track again.

He entered the area of Chemistry and Medicine. He trained as a neurosurgeon and became the best pediatric neurosurgeon in the world. Got married, had kids, and continues to have his mother's support. She was always saying he could be anything he wants because he was a clever kid.

Until he got a proposal to do the surgery on Siamese twins from Germany connected at the head since they were born. He planned an operation that included several types of doctors and surgeons. The procedure was done in twenty-two hours and both twins survived. Ben had to make a hard and risky decision to stop the babies' hearts and blood to be successful. It was dangerous, but he was very much appreciated for his effort in the end.

1. É comum que títulos de filmes sejam alterados ao serem distribuídos em outros países. Com base na leitura do texto, identifique e transcreva o título original (ou o título mencionado) da obra que conhecemos no Brasil como '**Mãos Talentosas**'.

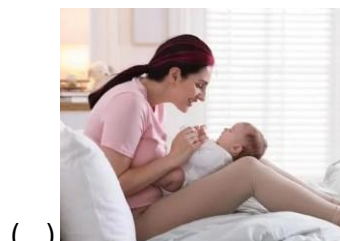

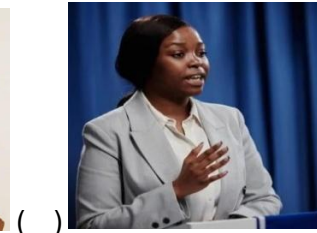

---

---

---

2. Associe as seguintes palavras encontradas no texto com as ilustrações.

- |                   |                |           |
|-------------------|----------------|-----------|
| (A) Chemicals     | (B) Classmates | (C) Dumb  |
| (D) Older brother | (E) Politician | (F) Rocks |
| (G) Single mother | (H) Twins      |           |

3. A estratégia principal utilizada por Sonya, mãe de Ben, para melhorar o desempenho escolar dos filhos foi obrigá-los a ler mais livros e ver menos TV. Encontre essa menção no texto e transcreva no espaço abaixo. (2º parágrafo).

---

---

---

4. Qual era o tema principal dos livros que Ben começou a ler e que o ajudaram a se tornar o melhor da classe? Escreva em inglês.

---

---

---

5. No final da semana, os irmãos deviam entregar um relatório sobre os livros que leram para a mãe. Indique em qual parágrafo essa informação é citada e dê o significado da palavra “relatório”.

---

---

---

6. O texto menciona que Ben tinha muita fé em Deus durante sua adolescência conturbada e que assim começou a voltar aos trilhos novamente. Transcreva essa citação. (3º parágrafo).

---

---

---

7. Na frase “***He entered the area of Chemistry and Medicine***”, o texto está falando sobre o quê na vida de Ben Carson?

---

---

---

8. Escreva **T** (True) ou **F** (False) para as afirmações em relação ao Ben.

- ( ) Teve filhos.  
( ) Casou.  
( ) Se formou como neurocirurgião.  
( ) Abandonou os estudos por causa das dificuldades na escola.  
( ) Nunca recebeu apoio da mãe em sua trajetória.

9. No clímax da história Ben precisou tomar uma decisão extremamente arriscada, a cirurgia dos gêmeos siameses. Qual era a nacionalidade dos bebês? Marque a alternativa e escreva em português.

- a) American.  
b) Polish.  
c) German.  
d) Dutch.

---

---

---

10. Escreva em inglês a quantidade de horas que foi necessário para a realização da cirurgia dos gêmeos.
