Leia o texto para responder às questões 1-5.

10 HABITS FOR GOOD HEALTH

1. Do a morning stretch: Stretching before getting out of bed wakes up the body, improves circulation, and promotes relaxation, helping to set the day's tone.

2. Stay hydrated: Proper hydration supports digestion, improves brain performance, and increases energy, among other health benefits.

3. Floss: Maintaining good oral health includes daily flossing, but make sure you do it right.

4. Apply sunscreen: Sunscreen is the best defense against skin-damaging rays.

5. Go nuts: When you crave a snack, reach for unsalted nuts and seeds like almonds, walnuts, peanuts, and cashews.

6. Nap: Afternoon naps can recharge a weary body and may boost cognitive function.

7. Bust some moves: Break up bouts of sitting with small bursts of movement.

8. Take a breather: Alternate-nostril breathing, in which you breathe through one nostril at a time, is believed to help reduce stress by slowing your breathing rhythm and forcing you to take deep, full breaths.

9. Enjoy a hobby: A study published online Sept. 11, 2023, by Nature Medicine suggests that having a hobby is good for people's overall health and mood.

10. Be social: Social interactions can stave off loneliness and protect against depression and cognitive decline.
